

Fellowship Trained Pediatric Radiologist – Seattle, Washington

ABOUT POSITION

Radia is seeking a board-certified/board-eligible pediatric radiologist to join our practice in Seattle, Washington. While the position offers enough pediatric radiology to meet CAQ requirements, it is not 100% pediatric radiology and therefore an interest in adult/general radiology is necessary. Skillset should include ability to perform pediatric hip and spine ultrasound independently of a sonographer. There may be limited procedural call for urgent pediatric procedures including air/barium enema.

If you are interested in this position, please submit CV and cover letter to jobs@radiax.com.

ABOUT RADIA

One of the most important decisions any physician makes is the practice they join.

Radia PS is a 100% physician owned and managed practice, dedicated to the care of patients.

We are seeking physicians to join Radia in our partnership track.

Physicians will be reviewed by the Board of Directors for partnership recommendation to the shareholders 12- 24 months from joining, based on experience.

Current partner professional side only (W2) cash compensation is between \$350k - \$700k/year, depending on how much you work, and has been increasing for the last 3 years. Average partner cash compensation is currently ~ \$450k, this is in addition to profit sharing, malpractice / health insurance, CME and related. Total partner average compensation is \$500k+.

A major difference between Radia and many practices, we have consciously chosen to keep partner buy-in low compared with other practices, we want to retain good physicians.

In addition to proprietary workflow software and related technology, we have implemented machine learning in our environment.

Radia is one of the very few practices in the country with the scale, technology and ownership structure to implement machine learning in a way that benefits patients and radiologists, not investors.
