

General/Body with Procedures – Olympic Peninsula

ABOUT THE POSITION

A unique opportunity to work in a small practice setting as part of the nation's largest 100% physician owned and operated radiology group. We are looking for a general/body radiologist with light interventional skills to be based at Olympic Medical Center in Port Angeles, located on the pristine Olympic Peninsula in Washington State. Procedural coverage needs include CT/US guided biopsy and drainage, lumbar puncture, paracentesis, thoracentesis, and joint aspiration and injection. The opportunity to develop additional procedures exists. No mammography is involved.

Olympic Medical Center (OMC) is a progressive, up-to-date 67 bed hospital where a medical staff of 125 offers a high standard of care. We operate a service-oriented practice and have excellent relationships with our referring providers. This is an opportunity to have access to state of the art equipment and all of the accoutrements that a well-established, innovative physician-led practice can offer, including access to 24/7 subspecialty teleradiology support and a 3D lab for advanced post processing.

Ideal work schedule: 3 weeks on and 1 week off with 1 in 4 weekend call. Evening/overnight diagnostic interpretations are covered remotely via our internal network. There is limited procedural call shared among the group.

If you are interested in this position, please submit CV and cover letter to jobs@radiax.com.

ABOUT RADIA

One of the most important decisions any physician makes is the practice they join.

Radia PS is a 100% physician owned and managed practice, dedicated to the care of patients.

We are seeking physicians to join Radia in our partnership track.

Physicians will be reviewed by the Board of Directors for partnership recommendation to the shareholders 12- 24 months from joining, based on experience.

Current partner professional side only (W2) cash compensation is between \$350k - \$700k/year, depending on how much you work, and has been increasing for the last 3 years. Average partner cash compensation is currently ~ \$450k, this is in addition to profit sharing, malpractice / health insurance, CME and related. Total partner average compensation is \$500k+.

A major difference between Radia and many practices, we have consciously chosen to keep partner buy-in low compared with other practices, we want to retain good physicians.

In addition to proprietary workflow software and related technology, we have implemented machine learning in our environment.

Radia is one of the very few practices in the country with the scale, technology and ownership structure to implement machine learning in a way that benefits patients and radiologists, not investors.
