A major difference between Radia and many practices: we have consciously chosen to keep partner buy-in low compared with other practices.

In addition to proprietary workflow software and related technology, we have implemented machine learning in our environment.

Radia is one of the very few practices in the country with the scale, technology and ownership structure to implement machine learning in a way that benefits patients and radiologists, not investors.

*Diagnostic Imaging* recently placed Washington State as the second-best state in the country for Radiologists. Additional information can be found <https://www.diagnosticimaging.com/di-executive/top-10-best-states-be-radiologist-2019>
