

Breast Imaging Medical Director – Seattle, Washington

We are looking for an experienced Breast Imaging Medical Director to oversee services at one of our partner facilities based in Kirkland Washington. This ACR Breast Center of Excellence offers state of the art services including 3-D/tomosynthesis, ultrasound, breast MRI and a full spectrum of interventional biopsy procedures. Radiologists are active members of the multidisciplinary team and work closely with dedicated breast surgeons, medical and radiation oncologists, pathologists and nurse navigators.

Breast Imaging Fellowship or extensive experience is required. Candidates with a proven record of developing and maintaining breast imaging services in conjunction with Hospital Administration are sought.

[General Job requirements]

Radia is looking for candidates who possess the following essential characteristics: exceptional technical competence, productivity and a desire to work for the good of the practice. Respect across the entire spectrum of individuals with whom we interact is a must.

This is a Shareholder Track position with limited general weekend call responsibilities

Radia is one of the largest and most progressive radiology groups in the nation. Our team of more than 160 board-certified radiologists, with specialty training in everything from Mammography to Neuroradiology and Musculoskeletal to Interventional, provide more than 30 hospital and specialty clinic partners throughout the Northwest with on-site radiology coverage and interpretations.

We provide a mentoring program to support and promote professional acuity and leadership skills.

Radia offers a rich work/life balance with a minimum of 10 weeks of vacation each year. We have a robust financial package including 401k w/ employer matching funds, profit sharing, competitive salaries and expense packages for continuing medical education.

Successful candidates will have the opportunity to work with cutting edge technology, 24/7 subspecialty coverage and our 3D lab for advanced post processing and supported through our distributed reading network.
