

General/Body with Procedures – Olympic Peninsula

ABOUT THE POSITION

A unique opportunity to work in a small practice setting as part of the nation's largest 100% physician owned and operated radiology group. We are looking for a general/body radiologist with light interventional skills to be based at Olympic Medical Center in Port Angeles, located on the pristine Olympic Peninsula in Washington State. Procedural coverage needs include CT/US guided biopsy and drainage, lumbar puncture, paracentesis, thoracentesis, and joint aspiration and injection. The opportunity to develop additional procedures exists. No mammography is involved.

Olympic Medical Center (OMC) is a progressive, up-to-date 67 bed hospital where a medical staff of 125 offers a high standard of care. We operate a service-oriented practice and have excellent relationships with our referring providers. This is an opportunity to have access to state of the art equipment and all of the accoutrements that a well-established, innovative physician-led practice can offer, including access to 24/7 subspecialty teleradiology support and a 3D lab for advanced post processing.

Ideal work schedule: 3 weeks on and 1 week off with 1 in 4 weekend call. Evening/overnight diagnostic interpretations are covered remotely via our internal network. There is limited procedural call shared among the group.

This is a partnership track position.

Radia offers a competitive compensation package including up to a \$25K signing bonus.

If interested, please submit your CV to Jobs@Radiax.com

ABOUT RADIA

One of the most important decisions any physician makes is the practice they join.

Radia PS is a 100% physician owned and managed practice, dedicated to the care of patients. Radia has been ranked #1 in private practice group size by the Radiology Business 2018 and 2019 Group Practice Surveys.

<https://www.radiologybusiness.com/topics/healthcare-economics/2019-group-practice-survey-exemplary-80>

Physicians will be reviewed by the Board of Directors for partnership recommendation to the shareholders 12- 24 months from joining, based on experience.

Compensation for this Position:

- First year guaranteed compensation (12-13 weeks off) is \$367,000.
- First year compensation (12-13 weeks off) with maximum performance pay is \$474,000.
- Shareholder compensation for this schedule is \$488,000.
- Additional income potential with working additional shifts.
- Profit sharing, malpractice, health insurance, and generous CME.

Radia has consciously chosen to keep partner buy-in low compared with other practices, we want to retain good physicians.

In addition to proprietary workflow software and related technology, we have implemented machine learning for 100% of studies in our environment. Radia is one of the very few practices in the country with the scale, technology and ownership structure to implement machine learning in a way that benefits patients and radiologists, not investors.
